

**Remote Service of
Rehabilitation
Technology**

**RESORT
Interest
Group**

What is RESORT?

RESORT is a telematic system dedicated to provide remote support to disabled users and their carer persons. It combines existing technologies as video conferencing and document sharing with innovative techniques as real time synchronisation of Rehabilitation Technology (RT) systems. RESORT provides an easy to use and adaptable user interface for TeleRehabilitation and an open interface specification which allows to make other PC-based RT systems RESORT compliant.

What is RIG?

The RESORT Interest Group (RIG) is based on the results of the EU funded DE-4208 RESORT project which was completed successfully in April 2001. The RIG was set up in early 2001 in order to create a framework for on-going activities in tele-support of RT.

Activities and Objectives of RIG

RIG is offering a framework for

- users who are interested in beta testing and applying RESORT in field trials
- setting up Resort Service Centres
- developers of RT interested in evaluating the Resort SDK and Protocol
- manufacturers interested in making their RT devices RESORTable
- providing TeleRehabilitation services
- discussing experiences with emerging issues of tele-help and tele support of RT

Members of RIG

fortec - Vienna Univ. of Technology (AT), Austrian Research Centre Seibersdorf (AT), Micro Centre – Univ. of Dundee (UK) and iRv – Institute for Rehabilitation Research (NL), Elisabethinum Axams (AT), RehaKomm – Lengenau (DE), Upper Springland Capability Scotland (UK), Tayside Orthopaedic and Rehabilitation Technology Centre (UK) and Stichting Revalidatie Limburg - Fransiscusoord Valkenburg a/d Geul (NL).
